

## 2400/2600 Series

### *Irritrol Systems...*

#### *The choice of the professional irrigation contractor*

Trust the products that irrigation contractors have counted on for years! Professional-grade Irritrol Systems components are designed and manufactured with a focus on heavy-duty construction, dependable operation and homeowner convenience.

A brand of The Toro Company specifically for professional irrigation installers, Irritrol Systems is a name you can trust to help provide the beautiful, trouble-free lawn and garden your home deserves.

As easy to install and service as they are dependable, these residential valves offer heavy-duty construction, reliable performance and convenient operation.

## 2400/2600 Series Valves: An easy choice for convenience and performance

Your valves represent the "heart" of your irrigation system. The system relies on them to ensure water flows to your sprinklers at the scheduled times and for the scheduled duration. It also relies on them to close securely to avoid leaking, puddles and wasted water.

With so much riding on their performance, reliability is a key feature.

Irritrol Systems 2400/2600 Series valves provide the level of reliable performance required in residential landscapes. Best of all, they combine this performance with outstanding convenience and flexibility.

### The 2400 Series straight-pattern and 2600 Series angle valves provide:

- Heavy-duty, corrosion- and UV-resistant PVC, glass-filled polypropylene and stainless steel construction for durability
- Angle and globe (straight pattern) models, as well as a vast array of connection options, for installation flexibility
- Rugged diaphragm construction to ensure a leak-proof seal
- An easy-open, threaded "jar-style" top for trouble-free installation and easy service without removal from the system
